

## FIPS Recodes

Several county FIPS code changes have occurred over our study period. To maintain consistency over time, we have merged the affected counties and assigned the merged counties a final FIPS code (e.g., in the first row of the table below, deaths and populations occurring in counties with FIPS codes 51019 and 51515 are summed and assigned the final FIPS code 51019). In the majority of cases, the metro/non-metro category of the constituent counties is the same. In a few cases where there are differences, the aggregated county is assigned the metro/non-metro designation of the county with the largest population size. (This recoding does not affect region codes since the merged counties are all within the same states and regions.)
